## Main Street to Be Gravelled

The stage is all set for a big improvement in Broadway and you are asked to be the actors. To make this go over will require the co-operation of everyone and we feel the town will get your support.

We all realize the necessity of more gravel on this road and now is an opportune time to do it. Horses are in condition. The fall work is done and the weather is in our favor, so let us make this one big success.

Community building is measured by community spirit and loyalty. If we want our town on the map we must do something to show our interest in our town. "Now is the time." If you haven't a team come anyway. Men will be needed at the pit to help load, and about twenty men will be needed to unload.

It is expected there will be from seventy five to one hundred wagons on the road, so be there to do your bit.

## News Notes

A special meeting of the Town Council and the Board of Trade Good Roads committee was held at the Town Hall last Wednesday to discuss the graveling of our main street. It was decided to commence hauling next Wednesday, November 21. Everyone with a team and wagon are asked to come out to help in the undertaking. The town will provide lumber for dump boards, and will build a screen and loading platform at the gravel pit. Committees were appointed to handle the details. The town asks your co-operation in the matter, so get ready for next Wednesday.

Jack Kenney left last Wednesday for Bingham, Utah, where he will spend the winter.

Some fifty farmers of the Lethbridge Northern project left Lethbridge shortly before 11 o'clock on Saturday morning for Raymond, where they investigated the beet sugar industry both from the growers' and the factory's end. The party gathered at the farm bureau office in the Sherbrook office and accompanied by a number of bureau officials and agricultural experts left for the sugar city. There is a lot of real interest in beets on the Lethbridge Northern and if the day's investigation is satisfactory it is not unlikely that up to 1,000 acres of beet will be planted on the new project next year.

William Myers, a sugar factory employee was using a live steam hose in cleaning his work when he lost control of the hose and the live steam shot into his eyes blinding him for a time. He can see from one eye and it is expected that he will regain the sight of the other.

At the town council meeting last Thursday evening the topic of interest was the problem of graveling our main street. After considerable discussion it was decided to present the matter to the Board of Trade and U. F. A. It was suggested that the hauling be done by the citizens, the town to put the gravel pit in shape and probably do the loading.

The Women's Institute wish to thank the public for the support given them on Poppy Day. 375 poppies were sold.

## Board of Trade Luncheon

Eighteen members of the board of trade met at the Club Cafe Wednesday afternoon. Dinner was served after which chairman T. O. King called the meeting to order. Secretary T. L. Halpin read the minutes of the last meeting and reported on the financial statement of the last stampede.

The report showed approximately \$600.00 credit after all expenses were paid.

Mayor P. W. Cope and members of the town council presented the matter of graveling Broadway. It was decided that the board of trade would do every thing possible to assist in this undertaking.

Mr. James E. Meeks suggested that something be done towards encouraging more students to enroll at the Agricultural School, intimating that if something is not done next year this school will be closed. The board appointed Mr. J. E. Meeks, Mr. Frank Taylor and Mr. N. C. Petersen to meet with the school principal, Mr. Longman and offer the support of the board of trade.

The wheat ear problem was discussed from every angle. It was reported that at towns along lines where railway competition existed the wheat was being moved. Chairman T. O. King and Secretary T. L. Halpin were authorized to wire the chairman of the grain commission asking relief in the matter.

Mr. J. U. Allred and Mr. I. B. Roberts, while in Calgary, will go to the officials of the C. P. R. asking relief from that angle.

## News Notes

D. C. Peterson, former editor of the Recorder, is now located in the city of Red Deer. "Pete" has purchased a new modern job printing equipment. The Recorder wishes him every success.

A new Vickle fire engine has been purchased by the town and will be ready for service in the very near future. This equipment is a complete outfit including a modern pump run by the motor of the truck, 1000 ft of 4 inch hose, ladders, axes and other details. It is planned to build storage tanks in various parts of the town from which the fire engine will receive its supply. The hose, approximately two block long, will reach the entire business section. This equipment will be housed next to the Recorder office in the place once occupied by the Raymond Pharmacy.

Starting today the Capitol Theatre becomes a laugh factory. Plain and fancy laughs will be turned out in unprecedented quantities. Spasmodic giggles; Superior snickers; Hilarious howls; Riotous roars and other forms of mirth will also be produced. A sideline of tingling thrills will be featured. Send the kiddies to the matinee Saturday at 2.15.

Mr. and Mrs. Lynn Bullock, of Barnwell, were guests at Thanksgiving time of Mr. and Mrs. A. McMullin.

## The Menace of Communism

The Sixth International Communist Congress held in Moscow this year declared its avowed policy "to concentrate Communist propaganda on the young people of the world," not on the young people of Russia, or even of Europe, but of the world.

Has that declaration any meaning for Canada? Is it one that the people of Canada need pay any attention to, or in regard to which they should take action?

Communism thrives where there is oppression, injustice, extreme poverty, lack of employment resulting in enforced idleness, and, inevitably arising from these conditions, general discontent. Satan still finds mischief for idle hands to do, and there is nothing quite so mischievous in the world today as Communism and its many pernicious doctrines.

Communism, therefore, found fertile ground in Russia owing to the centuries old oppressions and injustices of the old Tsarist regime, during which the most abject poverty and ignorance continued among the masses of the people alongside an aristocracy rolling in wealth and indulging in all forms of extravagance and luxury. The added sufferings, sacrifices and horrors of the Great War were all that was necessary to set the country aflame and provide the Communists with the opportunity they had long been awaiting.

In Canada, unlike Russia, there is no oppression of the people; injustice is not tolerated, and has only to be exposed to be remedied; cases of extreme poverty are rare indeed, and, when found, sympathetic governments, organizations and people respond to the call of need; work, as a rule, is available to all who are willing to work, and seasons of unemployment are but temporary and not a general thing; the overwhelming mass of the people are happy and contented. The soil of Canada is, therefore, not fertile ground for cultivation by the Communist agitator.

Nevertheless, Canada is not being ignored by the Communists of Russia in their visionary attempt to grasp world power through the overthrow of all institutions of law and order, all religions, the destruction of all present forms of government, and the confiscation of all property and other rights of individuals. The Communist will never be satisfied until he brings about a reign of terror and a condition of chaos in all countries similar to that created by him in Russia and in certain portions of China. Wherever there is trouble, whether political, social or economic, there the Communist sees his opportunity, and in the past Canada has not been free from manifestations of Communist intrigue and activity. And the Moscow authorities stand ever ready to finance and otherwise support all such efforts.

The Communist leaders realize, however, that they cannot make much headway with the adult populations of Canada, the United States, and the self-governing Dominions of the British Commonwealth. Hence their openly avowed intention to concentrate their propagandist activities on "the young people of the world."

And therein lies the danger to Canada. If in their youth while their minds are plastic and open to receive impressions, and before their characters are formed, the boys and girls of Canada, or of any country, can be inoculated with the virus of Communist disbelief in God and religion, Communist repudiation of all accepted ideas of morality as merely man-made restrictions on individual liberty, Communist rebellion against all constitutional systems of government and courts of law and justice, and Communist doctrine that there is nothing good but everything that is bad in all countries except Russia where, for the time being, Communism holds the whip hand and wields a lash over everybody who dares to voice even the mildest criticism of its methods,—if, we say, the youth of Canada can be infected with such ideas, then the very foundations of all that we revere and hold dear in Canada today are being very seriously undermined.

Communism is conducting such a campaign in Canada at the present time. The orders of the International Congress, at Moscow, are being carried out to the letter. Communist day schools and Soviet Sunday schools are being conducted, the most pernicious literature for children is being circulated, and every conceivable plan to attract the interest of the children is adopted and followed. In an age when there is a youthful tendency to scoff at religion as old-fashioned, God, the church, and all religion is openly as well as covertly attacked. Modern youth is encouraged to "go the limit" in throwing off the conventions and restraints of the past, and are ridiculed if they hesitate to do so. The sanctity of the home is laughed at, and parental, as well as all other forms of authority repudiated as forms of slavery and a denial of the rights of youth.

The campaign is highly dangerous. It is an insidious campaign, and therein lies its greatest danger because it is so frequently difficult to locate and combat it. But it must be fought and dragged into the open for the ugly thing it is, otherwise grief and sorrow is being prepared for parents and children alike, for the home, the church, and the state.

In setting their faces sternly against this disruptive thing, let the Canadian people see to it that no oppression, no injustice, no suffering through poverty or because of lack of work, is allowed anywhere in the Dominion. Let the churches forget their minor differences in doctrine or in forms of worship, and, instead of fighting each, unite their forces in order that effective warfare may be waged on a system which, if it is not destroyed, will ultimately destroy all churches and all religion, and, in destroying these great bulwarks, destroy also the home and the state, and lead to the damnation of the individual.

## Big Demand For Sheep

British Columbia Owners Shipping  
Thousands To Market

Along with the vastly improved position and prospects of grain farmers, beef cattle men in British Columbia, who held on during lean years, are reaping their reward. Sheep farmers as usual are on velvet—sheep have been a consistently good bet in British Columbia for years, and appear likely to remain so. Heron Bros., with 135 per cent. increase from the lamb crop are shipping between three and four thousand head

to market and retaining around one thousand ewe lambs for breeding stock. The demand for sheep is strong and, with more and more farmers getting into the game on a big scale and farmers generally turning their attention to sheep in smaller numbers, the temptation to sell is almost irresistible.

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attract its excellence, for in all these countries it is on sale and in demand.

Pennies to the number of 800,000,000 are collected every year from the slot gas-meters of consumers served by the Gas Light and Coke Company, London.

A Scotchman recently sued a baseball company because he was hurt while watching a ball game. He fell out of a tree.

## Oil Shale and Tar Sands

Vast Resources Located In Maritimes  
and In Alberta

Canada has vast resources of oil shale and bituminous sands, the former occurring in Maritime Provinces, and the latter in Alberta. These deposits have long been considered as potential sources of products generally obtained from crude petroleum. As a result of recent modifications in refining methods these raw materials may now be seriously considered as sources, to be drawn upon when needed, to help in supplying the rapidly increasing demand for motor fuel.

## WOMEN OF MIDDLE AGE

Need Rich, Red Blood To  
Maintain Good Health

After passing the age of forty every woman has reason to grow anxious about her health. This time of life, with its attacks of faintness and fits of depression, its often violent headaches and back pains is rightly dreaded by women; but if reasonable steps are taken to safeguard the health, no serious ill-effects will arise. At this turning point in life Dr. Williams' Pink Pills have given a helping hand to thousands of suffering women who were fighting a hopeless battle against poor health and waning strength.

The very best help for any woman of middle age is the health help given by Dr. Williams' Pink Pills. These pills reinforce the blood supply, enriching and purifying it. In doing this they nourish the starved and overtaxed nerves and give new strength and vitality to the whole system. By this natural process Dr. Williams' Pink Pills completely dispel all pains and weakness, and a better, happier condition of health and spirits arises.

Every woman of middle age should take advantage now of the wonderful health-help of Dr. Williams' Pink Pills. They are sold by all medicine dealers or will be sent by mail at 50 cents a box, by The Dr. Williams' Medicine Co., Brockville, Ont.

## Help For Mental Cases

Administration Of Gaseous Mixture  
Has Strange Results

A miraculous demonstration of awakening persons mentally dead was made by University of Wisconsin scientists before the seventh annual convention of the Central Neuro-psychiatric Association, at Madison, Wis.

Two patients from the state insane asylum were aroused from mental and physical stupors lasting over many months by administration of a gaseous mixture. The patients sat up, moved naturally and talked lucidly.

## Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brousseau, Magog, Que., writes: "For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

A man is as old as he feels; a woman as old as she feels inclined to tell you.

## Canadian Arctic Expedition

Well On the Way To Frozen North,  
Equipped With Radio

An example of the use of Canadian products by the Canadian Government in important scientific and exploration work comes with a report of the departure from Ottawa of the Canadian Arctic Expedition, organized by the Northwest and Yukon Branch of the Canadian Department of the Interior.

The expedition was under the direction of Major L. T. Burwash, well known Canadian Governmental explorer, who has spent much time in the far North. Press reports this summer indicated that Major Burwash was off on one of his solitary jaunts, but the general Canadian Arctic Expedition, according to information from Toronto, left that city in three parties.

All three parties were equipped with Eveready radio "B" batteries on the sets supplied for the expedition by the Department of Marine and Fisheries. Word has reached headquarters of the Canadian National Carbon Company that all branches of this Department are using Canadian National Carbon Company products.

Reports this summer on Major Burwash's activities indicate he was engaged in exploration of unusual scientific interest which promises to yield also an abundance of romance. He planned a jaunt of 5,000 miles by railroad, boat and dog team leading him to the magnetic pole, the trip being planned partly as a hunt for relics of the Arctic expedition of Sir John Franklin which ended in disaster in 1845.

Rumor sifting back occasionally from the frozen North has told that one of Franklin's two ships, the Erebus and the Terror, may be sighted in the Arctic Ocean near King William Land or Boothia Peninsula. If the ship can be found the Canadian Government will be enriched by the recovery of old relics and records believed to be aboard her.

Major Burwash also planned to investigate conditions among the Eskimos north of Mackenzie and Keewatin and the proposed tractor-train route from Wagner Bay on the West Coast of Hudson Bay to Cookburn Bay south of King William Land.

One of the primary purposes for the expedition assigned by press reports is to determine the westward shift of the magnetic pole so that mariners' charts may be corrected.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

## School Of Education

University Of Alberta To Assist  
Graduates To Enter Teaching  
Profession

A school of education is being established at the University of Alberta with a view to enabling students desiring to enter the profession of teaching at the end of their university career to do this far more conveniently than has been the case in the past. The university senate and the provincial department of education have arranged for the opening of the school of education during the present session, but the scheme will not be in full effect until next year.

## Radio In Canada

The total number of licensed radio stations in operation in the Dominion and on ships registered therein was 216,700 on March 31, 1927.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unfit for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

The California Valley quail has been successfully introduced into such distant countries as Chile and New Zealand.

Worms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and mal-nutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutriment of the child is assured and development in every way encouraged.

## Famous Holstein Herd Provides High Bred Cattle For Western Development

With the dual object of producing supplies for its own use and to provide high bred cattle for Western development, the Canadian Pacific Railway established about eighteen years ago a herd of Holstein cattle at Strathmore, in Alberta. The foundation herd was small, but even at its beginning included several cows afterwards distinguished as great producers. Since then only the best sires from ancestors of proven merit have been used. In the natural course of events, these sires were bound to bring about a wonderful improvement in the parent herd.

Taking as its motto "High production with show ring quality" and insisting that the Strathmore Farm be a paying proposition, the Animal Husbandry Department of the Canadian Pacific has consistently pursued the policy of breeding a herd of uniformly good quality and distinctive Holstein type. Special attention has also been devoted to obtaining high milk and butter fat production.

Strathmore herd now comprises

dam and three grandparents were all born on the Strathmore Farm.

The Carnation Milk Company of Seattle has the finest herd in the world—none but the finest cattle are considered. A few years ago they started the breeding world by paying \$100,000.00 at public auction for a Holstein bull. And they wanted to add little Strathmore Veeman Fairchild—161846—to their herd. So after the Vancouver Exhibition, she changed her country and her colours and is now being shown with the great Carnation herd at the greatest United States cattle shows. She won first at the Kentucky State Fair, and at Fares, Nashville, and Chattanooga, being Senior and Grand Champion at the latter show.

Two young bulls, Strathmore McKinley Fairchild Wayne—70852—and Strathmore DeWinton Matchless—71977—were junior and reserve junior champions at each of the prairie shows. At Victoria and New Westminster, Strathmore McKinley Fairchild Wayne was senior and grand

### Polar Weather Reservoir

Wilkins Expedition To Antarctic To Study Conditions

Study of the largest of the world's two great polar weather reservoirs is the main objective of the three aviators comprising the Wilkins Expedition, now en route to Antarctica.

The ice cap, as large as Europe, which covers the Antarctic continent, is regarded by meteorologists as the focal weather control of the southern hemisphere.

The few records in existence indicate it is invariably an area of anticyclone. This is the well known kind of area marked on every United States weather map as "high," a region of high barometer pressure. A characteristic of anti-cyclones is that the air-currents, revolving about the centre of the area, tend to blow outward from the centre. A notable phenomenon of Antarctica's meteorology has been the favorable reports that the prevailing surface winds along its outer edges blow outward. Numbers of weather experts have concluded that the South Pole may be blanketed with a "high" area as large as Australia.

Undoubtedly personal liberty is a good thing, but we don't like to ride with a driver who is full of it.

### CANADIAN LITERATURE

Professor Joseph McCabe, the famous English lecturer and litterateur, styled "the most learned man living today," who says: "Canadian literature? I never heard of it. But Canadian science is the greatest in the world." He is at present lecturing in Canada.

### Detective Stories

#### Good Nerve Tonic

Research Worker Claims They Are An Ideal Sedative

Many big business men, lawyers and statesmen have admitted a fondness for detective stories because of the distraction which they afford. Now it appears that there is still another good reason for indulging in a taste for thrilling mystery tales. According to a prescription being worked out in the psychological laboratories of the University of Chicago, blood-and-thunder fiction is an ideal sedative for the high pressure worker.

A research worker is demonstrating this theory by thoroughly scientific means, using graphs of pulse, charts of respiration and other exact data. After an hour's reading of a thriller, the subjects invariably show "a quieter pulse, a slower respiration and greater self-control." The experimenter hopes to prove that the reading of absorbing fiction is one of the best of nerve tonics.

Devoted readers of detective stories are ready to agree with almost anything in praise of their favorite brand of fiction. But they will find it hard to believe that when the thief pockets the pearls and dashes the lamp to the floor their pulses beat slower, or that when the Unknown Terror lurks in the dark just outside the heroine's door they breathe easily and calmly.

#### When Is a Canadian?

"Never" Seems To Be Answer To This Question

Many people in this country today are third and fourth generation Canadians. The vagaries of the census may write them down as English, Danish or Irish, but these people in the majority of cases have never seen England, Denmark or Ireland. They know rather less about them than they probably should, and have no sense whatever of any deep and abiding personal connection with them. But apparently they are to be recorded to the end of the chapter, and their children after them, under the caption of some overseas nationality which is almost as remote to them as Adam. This raises the interesting question: "When is a Canadian, if ever?"

#### Defective Eyesight

Urban Life Shown To Be Responsible For Eye Strain

As a result of the great strain on the eyes by the complexity of modern civilization, particularly in connection with urban life, it is estimated that seven out of every 10 people in the large centres of population have defective eyesight. Jerry Britton, a consulting optometrist in Montreal, in a recent address in which he produced a moving picture illustrating this, said it was caused by the reaction of the daily demands of urban life upon the delicate organism of the eye. The effect was felt by young and old alike, he said. Human eyes are not adapted to the environment given by modern civilization, according to the speaker.

#### Chromite Mines

Canada's principal chromite mines are situated in the Colerain district, Quebec, and are regarded as capable of producing large quantities of ore.

Visitor: "Did you see everything in Washington?"  
Bobby: "No, ma'am, daddy could not show me the red tape."

The longest fence in the world is one of wire-netting in Australia, 1,236 miles long. Its object is to keep rabbits from cultivated fields.

## High Quality of 1928 Wheat Crop Revealed By Dominion Grain Research Laboratory Tests

### Welcome To British Farmers

The Hundred Cottage Plan To Meeting With a Good Reception

The farmers of Western Canada have accorded an unmistakable welcome to the 100 Cottages Plan of the Canadian Pacific Railway—the scheme jointly arranged by Lord Lovat, British Under-Secretary of Dominion Affairs and the railway's Department of Colonization and Development. As illustrating the cordiality of welcome to the British farmer families who will occupy these cottages, until graduating as full-fledged farmers "on their own"—C. A. Van Scoy, C.P.R. Superintendent of Colonization here, says that applications from the Canadian farmers for these cottages greatly exceed the proposed supply. The present plan is to have 20 of these cottages in Manitoba, 45 in Saskatchewan, and 35 in Alberta.

### Garnet and Reward Wheat

25,000 Bushels Of Seed Wheat To Be Distributed This Year

Nearly 25,000 bushels of seed wheat of the Garnet and Reward varieties will be furnished farmers by the Department of Agriculture this year, it is announced. This compares with 3,000 bushels last year—and the demand this year is greater than the supply. The new varieties were developed by the Dominion Cerealist, L. H. Newman, at the Experimental Farm, at Ottawa. Garnet and Reward wheat ripens a week or more earlier than Marquis, by which means the hazards from frost and rust are considerably lessened.

### Winnipeg Newspaper Union

#### Delightful Sports Mode

It simulates the two-piece mode with hip yoke inserted between diagonal closing bodice and smartly plaited skirt. The youthful neckline with shawl collar and sleeve hands add a tailored finish. Style No. 982 designed in sizes 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust measure, can be made of sheer tweed, patterned wool jersey, crepe satin, emment-crepe, flut silk crepe, crepe Elizabeth, printed and plain sheer velvet and wool crepe. A few seams to join and it's finished, and made at a substantial saving. The 36-inch size requires 3 1/2 yards of 40-inch material with 1/4 yard of 40-inch contrasting. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

#### How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg

Pattern No. .... Size .....

Name .....

To persons who have preached the need of precautions against a lowering of the standard of quality of Canada's wheat, a report just issued from the Dominion Grain Research Laboratory in Winnipeg will be reassuring. Some months ago Dr. Robert Magill, Secretary of the Winnipeg Grain Exchange, said that the wheat crop of 1927, though very satisfactory from the standpoint of quantity, was not so satisfactory from the standpoint of quality. He asserted that of the wheat grown in the Provinces and inspected at Winnipeg, only about 1 per cent. graded No. 1 Northern, and only 6 or 7 per cent. graded No. 2 Northern. In other words, he indicated that some 82 per cent. of the wheat inspected at Winnipeg graded No. 3 Northern or lower. This situation Dr. Magill attributed, in part, to weather conditions in sections of the prairie region and, in part, to the class of grain planted by some farmers in that part of the Dominion. The Secretary of the Winnipeg Grain Exchange touched upon a topic that Mr. L. H. Newman, the Dominion Cerealist; Mr. G. A. Clark, the Dominion Seed Commissioner; prominent members of the Canadian Seed Growers' Association, and the directors of the Saskatchewan Wheat Pool had discussed. Mr. Newman told the Committee on Agriculture of the Dominion House of Commons a year or more ago and the Saskatchewan Pool directors later asserted that some farmers in Western Canada, in the hope of attaining higher acre yields or of reducing their risk of losses from rust infections, had been sowing varieties of wheat that were not so desirable as the standard varieties from the standpoint of milling and baking qualities.

The report now issued from the Dominion Grain Research Laboratory reveals the results of tests of the milling and baking qualities of wheat of the crop grown this year. The tests were made with samples of grain from all the three western provinces, secured from the office of the chief grain inspector. Those samples were regarded as fairly representative of the whole western crop. The report, prepared by F. J. Elchard and T. R. Attkin, says that the moisture content of the wheat in all grades is low and that to date very little tough grain and no damp grain has appeared on the market. The weight per bushel of each grade of wheat, states the report, is higher than that of last year; the protein content of the wheat is higher in each grade; the quality of the protein is superior, particularly in the lower grades, to that of last year, and the baking quality of the flour made from each grade is decidedly superior to that of last year. The high milling and baking quality of the commercial grades is attributed to the fact that all the lower grades contain a considerable percentage of hard, plump, sound wheat, that frost did not occur until the wheat was nearly matured and that most of the crop was harvested under very favorable conditions. All this is very gratifying to the farmers and to the people of the country at large. Canada has gathered this year the most bountiful yield of wheat in its history. That wheat, according to the report from the Dominion Grain Research Laboratory, is of the kind that commands the readiest sale in the markets of the world.—Toronto Mail and Empire.

#### Will Remain Permanently

Employment officials at Regina state that out of the 6,000 British harvesters brought to Saskatchewan, at least 75 per cent. will remain in the West to become permanent Canadian citizens.

"You're looking bad, Scotty."  
"Aye, Ah'm suffering frae an awful sore throat."  
"Gosh! Anybody treating you for it?"  
"No—that's the trouble!"

"Look here, before we fight for her let us toss for her!" Jugend, Munich

Upper left—Colony Morag McKinley 34647—Senior Sire of herd at Strathmore, Supply Farm. By many prominent Holstein breeders considered to be the best in Canada. Has 25 daughters with records at two years of age. His eight daughters on test at present producing an average of 70.2 milk per cow per day. This bull was many times senior and Grand Champion on Western Circuit.

Upper right—Strathmore Veeman Fairchild—161846—Two year old heifer bred at C.P.R. Supply Farm, Strathmore. Grand Champion female at Edmonton, Saskatoon, Regina, and Vancouver, 1928. Sold at close of Vancouver Fair to Carnation Milk Farms, Seattle. She is the first prairie bred female to be adjudged Grand Champion at a western show.

Lower—Strathmore DeWinton Matchless—71977—Junior Bull Calf. Strathmore McKinley Fairchild Wayne—70852—Senior Bull Calf. Colony Koba McKinley, 31st—64799—Senior yearling bull included in Strathmore Show herd, 1928.

over six hundred head of high quality purebred Holsteins, the largest herd of dairy cattle in Canada.

To make a record performance a cow must give over 12,500 pounds of milk in 365 days. Strathmore Farm has 140 record performances to its credit, the highest being 24,500 pounds of milk with 966.25 pounds of butter. There are now on test several cows which will equal this, and at least two who will set a new standard of production.

Perhaps the greatest stimulus to dairying in Western Canada is given by the "A" Circuit Fairs. Cattle are shown here, owners and herdsman meet together and exchange opinions and the smaller farmer reaps a large share of the benefit therefrom. The herd from Strathmore has been exhibited at Brandon, Calgary, Edmonton, Saskatoon, and Regina for years. This year a strong representation was sent out, particularly as regards young animals. After the "A" Circuit Fairs the herd participated in Vancouver, Victoria and New Westminster shows.

At these eight shows the Strathmore herd won one hundred first prizes, two thirds of all those offered, six Grand Championships, and fifteen Junior Championships fell to its lot. "Strathmore Veeman Fairchild"—161846—a two year old heifer bred on the farm, was Grand Champion female at Edmonton, Saskatoon, Regina, and again at Vancouver. She is the first female bred on the prairie to win this award at a Western "A" Circuit show. Her sire and her

champion male, while Strathmore DeWinton Matchless won junior and reserve grand championship. Competition at these fairs is keen, with Holsteins from famous herds in Ontario, from the Colony Farm herd and others being shown. With the exception of the Junior herd sire, all the cattle shown were bred on the Strathmore Farm. All their dams were bred there and are still profitable producers in the herd.

Of the many bull calves born annually at Strathmore, only those are reared for sale that are from dams which grade either "Gold Medal" or "Excellent" or are from dams not themselves in either of these grades but having an R.O.P. record of at least 20,000 pounds of milk in a year. All other bull calves are slaughtered at birth.

#### Threshing About Completed

Most of Canada's record wheat crop, estimated at over 550,000,000 bushels is now threshed and a substantial proportion of the grain is moving to the markets of the world. It is estimated that about 400,000,000 bushels of the 1928 crop will be available for export, about one-quarter of which will be shipped via Pacific ports, principally Vancouver, and the other three-quarters or 300,000,000 bushels will go eastward.

#### The Charm Of Solitude

"One's neighbor in Australia," a friend writes, "often lives as much as twenty miles away." In that country, when a man buys a lawnmower, it practically becomes his own property.

### Feeding Steers Loose Or Tied

Steers Fed In Loose Pens Make Better Gains

Steers feeding for the market in loose pens made better and more economical gains at the Lennoxville, Quebec, Experimental Station, than those fed tied in the stalls. During a period of nine years in which these methods of housing have been under test, the cattle running loose gave the best returns in all but two seasons. Last year the steers tied in stalls made slightly better gains amounting to 1.99 pounds per steer per day at a cost of 7.10 cents per pound of gain as against 7.75 pounds per steer per day at a cost of 8.09 cents a pound for those running loose in the pens. From his experience with these tests the superintendent of the station, in his report for last year, published by the Department of Agriculture, at Ottawa, reports that steers fed in loose pens make the more economical gains taking one year with another.

"I believe a horse understands more than a dog."

"I don't."  
"Very likely but I was speaking of the horse."

"Pop, what's a pessimist?"

"A pessimist, son, is a chap who won't cash the checks he gets for fear they might come back marked insufficient funds."

## WORLD HAPPENINGS BRIEFLY TOLD

Robert Bell, president of the Press Congress of the World, has announced that the next session of the congress will be held at Ottawa, Ont., in July, 1929.

An all-red route around the world is seen as a strong possibility in the near future by J. A. Wilson, controller of civil aviation, who has returned after spending two months in the British Isles and Europe.

C. Lee, it is announced will succeed Chow Kwo Yen as consul-general for China in Canada following the request of the latter who desires to return to his native land after four years' residence in the Dominion.

The Rev. Reinben Archer Torrey, evangelist and Congregational minister, who was associated with the late Dwight L. Moody for nearly 20 years, is dead at his home in Asheville, N.C., in his 73rd year.

England's first demonstration of broadcasting pictures took place recently when the British Broadcasting Corporation successfully transmitted a portrait of King George 100 miles from the Daventry experimental station to Manchester.

The honor of having been the first woman private pilot to graduate from the ranks of the flying clubs in Canada went to Winnipeg, whose first lady member, Miss Eileen Magill, was passed upon by the civil aviation branch of the Department of National Defence.

Martha Ostenso has been in the sheep ranching country of the Canadian Rockies getting local color for a new novel. Miss Ostenso is planning a trip to Europe this autumn, and will visit, among other countries, Norway, the land from which her parents came to Canada.

Using the airplane from which Alfred Loewenstein, the Belgian financier, fell into the English Channel and was killed, last July 4, a party of sportsmen headed by Lt.-Commander Glen Kildston, left England for Africa on the first aerial big game hunt. The airplane has been thoroughly overhauled and refitted.

### Western Canada Motorized

A recent analysis shows that 38 out of every 100 farmers in Western Canada own a motor car and 18 out of every 100 farms have gasoline tractors.

London claims the largest ice skating rink in the world in Richmond Ice Skating Club that will open this fall. The skating area is said to be 4,300 square feet.

## MOTHER OF TWINS HELPED

Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak I could not do my work because of pains all the way up my legs at the back. I also had headaches and got very little sleep. I took Lydia E. Pinkham's Vegetable Compound, and soon I was able to get up and do my work. I have taken three bottles and I am fine, do my work without trouble and am gaining in weight and strength. I will gladly recommend the Vegetable Compound to anyone."—Mrs. F. STATION, Box 220, Mitchell, Ont.

### Light Beam Produces Music

Expert Could Stop Sound By Blocking Light With His Hand

A narrow beam of light cast about an assembly room in the Hotel Biltmore, at Atlanta, Georgia, was changed into music and held under perfect control at the will of John Bellamy Taylor, consulting engineer of the General Electric Company at Schenectady, N.Y.

The demonstration, given before the American Institute of Electrical Engineers, was made possible through a complicated apparatus by which electrical impulse is controlled by the beam of light, and represented what Mr. Taylor called "narrow castings." The equipment used in the demonstration is known as a photo-phone, built on old principles, Mr. Taylor said, but utilizing the perfected photo-electric tube, electric pick-up and newly developed amplifiers and sound reproducers.

An ordinary phonograph with an intricate electrical attachment was used in producing the music. The electrical energy was sent over a light beam in transforming and reproducing elements mounted on a tripod across the room, and music and sound was the result. When Mr. Taylor would hold up his hand in the path of light the music would stop, and as he allowed the light to filter through his fingers the music increased in volume.

## THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Tailored Junior Dress

The small girl today can be as fastidious as her debutante sister in the choosing of her frocks. Design No. 356 buttons down the front, has long sleeves with narrow cuffs and features the convertible collar. It may be worn with or without the wide belt. It will be the delight of any little girl to have a frock like this, of novelty plaid woolsens, sheer tweed, wool jersey, printed linen, printed plaue, wool challis, wool crepe or velvet. Pattern in sizes 6, 8, 10, 12 and 14 years. It only requires 2 yards of 36-inch material with 3/4 yard of 27-inch contrasting. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

### Another Story About Ants

Psychologist Tells How They Extinguish Fire With Formic Acid

Speaking of flea circuses, here is a story about ants who act as firemen supported by no less an authority than the Journal de Psychologie, edited by Dr. Pierre Janet, internationally known psychologist, of Paris. Marguerite Combes, an entomologist of note, introduced a lighted candle into an ant-hill in the forest of Fontainebleau not far from Paris, a hill of brown ants known as "formic rufa." The ants scurried about a bit and then proceeded to extinguish the flame by squirting formic acid upon it.

These ants are definitely of a higher order than other species inhabiting the forest. In other hills, the ants either became panic stricken or died trying to bite the flame. Where they had the intelligence to try to extinguish the fire by acid, they lacked the ability to direct the stream effectively.

### Recipes For This Week

(By Betty Barclay)

#### SCHOOL CHILDREN'S SANDWICHES

Mix thoroughly together one can salmon, 1/2 pound of cottage cheese and one small can pimento peppers. Season with salt and pepper and add enough thick cream or any good salad dressing to make a smooth paste, thin enough to spread. Butter one thin slice of brown or bran bread, spread filling on thin slice of white bread, and put together.

#### STUFFED HEART

Beef heart.  
1 cup cracker crumbs.  
1/2 cup white sauce.  
1 cup roasted chestnuts.  
Salt and pepper to taste.  
Wash the heart thoroughly inside and out. Stuff with dressing made from ingredients given above and sew up opening of the heart. Cover with water and boil ten minutes, then simmer until tender. Remove heart from water one-half hour before serving and sprinkle with cracker crumbs, salt and pepper. Bake until brown.

Once a man has been created a Knight of the Garter, he must wear some part of the insignia day and night. Most of the knights wear the badge of the order—which is made of silver—when sleeping.

Minard's Liniment Heals Cuts and Bruises.

"Will you give me a nickel, sir, for a cup of coffee and a roll?"  
"Sure thing, old man, if you'll show me where you get all that for five cents."

### The Best Laxative He Ever Tried

I enjoy my sleep and get up refreshed with a clear head ready for a day's work." **CARTER'S LITTLE LIVER PILLS** Sold all druggists 25c and 75c red pills.

## SUNDAY SCHOOL LESSON

NOVEMBER 11

### PEACE AND GOOD WILL AMONG MEN

Golden Text: "Be not overcome of evil, but overcome evil with good."—Romans 12:21.

Lesson: Romans 12:1-21.  
Devotional Reading: Philippians 2:5-11.

#### Explanations and Comments

A Call To Consecration For Service, verses 1 and 2.—The meaning of these two long verses has been aptly expressed in these brief words: In view of all that God has done for us, we should henceforth live for him.

The One Volume Commentary paraphrases the verses thus: God's redeeming love should be answered by the true sacrifice and spiritual, ritual service of a life of purity and self-denial and work for God. Do not follow the fashion and customs of the worldly society around you, but let your ways of thinking be so changed by the Holy Spirit that you look for and recognize God's will and love to do it.

"Present your bodies a living sacrifice, holy, acceptable to God."

"No maimed or crippled thing might be offered to God by the Jewish law. If we would devote ourselves to God, we must see to it that we have a self to devote. Self-consecration is not a negative thing; it is a very positive thing. Even our Lord said in His high-priestly prayer: 'For their sakes I consecrate myself.' Self-consecration is the most effectual way in which we can serve God in our generation. That is the way in which the torch has been handed down by a long succession of runners since the Gospel of Christ came into the world. Ask yourselves how you have been helped by others. You will find, I think, that the occasions have been most trivial, that the words spoken and the things done have been slight and unpremeditated. They have been sidelights upon the person's character, peeps into the inner life of one whose mind is kept in perfect peace because it rests on God; of one who sees God because his heart is pure. It is the sudden sting of self-reproach, the shame of the contrast, the longing to be like such a one, that sends a man to his knees as soon as he is alone. Sometimes when such a man or woman dies we learn for the first time, not without surprise, what he or she has been to many. Such persons have laid up a rich store of gratitude for being what God has helped them to be."—R. W. Inge.

#### Everyone Should Have Vacation

All Work and No Play Not Good For People  
The city dweller has been sold pretty thoroughly on the idea of a yearly vacation. It may be to the shore, to the mountains, to the lake or to the farm—but it is a vacation that puts new blood into his veins and brings the tint of roses to the cheeks of wife and children.

Those who dwell in the great open spaces seldom find time for a vacation. Work, to some extent, makes the man of the home forget its loss, and unfortunately it makes him also lose sight of that look of longing that comes over the face of his better-half as she reads the lures of vacation lands and sees more fortunate friends and neighbors climbing into the family car for a week or ten days "on the road."

Each man owes to himself and to his family to take a vacation. Death comes in due time, and a forced vacation is taken—often many years before it would be necessary were a little play mixed with each year's work.

We can't take our money into the tomb. We can't get all life holds for us by work alone. Now that the crops are in, take a vacation. Go anywhere. Stay two weeks, ten days, one week, or at least for a few days. Use the train, the steamer or the family car. But do something that will be a change and that will bring smiles to both old and young faces that seem to have forgotten how to smile.

Vacation days pass quickly, but vacation remembrances live for an entire year. Take a vacation.—Richard S. Bond.

#### Famous Nakimu Caves

Near the summit of the Selkirk range of mountains in British Columbia, is one of the most remarkable series of subterranean passages found on this continent. These passages are the Nakimu Caves, in the Glacier National Park, one of the scenic areas administered by the National Parks of Canada, Department of the Interior.

#### Canadian Mica

Practically all of the mica produced in Canada is of the amber variety (Phlogopite). Mica is marketed in the rough-cobbed state, as trimmed sheet, splittings, scraps, and ground mica. Trimming and splitting is done by hand.

Marriage was the name of a couple who sought a separation order at North London Police Court.

#### Canadian Mica

### Not Confined To Canadians

All Subjects Of King George May Cross Border To Work

Living in Canada and working in the United States is the privilege of all British subjects, no matter where they hail from. So says the supreme court of the United States. The widespread impression that this privilege is limited to Canadian citizens is wrong. The Jay treaty of 1794, on which the decision rests, does not mention Canadians either native-born or foreign-born. It says that "his majesty's subjects" and "citizens of the United States" shall have the right "freely to pass and repass by land or inland navigation into the respective territory and countries of the two parties on the continent to America." This applies to British subjects from Scotland, New Zealand, Honduras and many other quarters as well as Canada.

The little labor marplots, who persuaded immigration headquarters to bar their Canadian neighbors when they dared to work here for a living without asking the permission of a union, have done an unwitting service to the cause of international comity and English-speaking friendship.

#### Mount Robson

The summit of Robson pass is a broad gravel flat extending between Adolphus Lake on the Alberta side and Berg Lake in British Columbia, the two lakes lying about a mile apart. In no other pass in the Rockies does one mountain so dominate the entire landscape as does Mount Robson. Its enormous mass (altitude, 12,972 feet), towers 7,532 feet above the summit of the pass at such close range as to literally overshadow it.

## When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

## Official Welcome Given To High Commissioner From Great Britain

Ottawa.—Canada recently gave official welcome to the first high commissioner from Great Britain to this Dominion. At a Government dinner presided over by Right Hon. W. L. Mackenzie King, Prime Minister, and attended by members of the cabinet, by Hon. R. B. Bennett, leader of the Conservative party, and by others prominent in the political, social and business life of the Dominion, Sir William Clark, and the members of his family were accorded an eloquent and hearty welcome to Canada.

And not only Canadians at home, but representatives of the Dominion abroad joined in the welcome. From Canada's high commissioner in London, and from her ministers at Washington, and Paris, came greetings by cable and telegraph—messages of goodwill to the man who has been selected for the important post of first representative of the British Government in Ottawa.

The importance of the step which has been taken by the British government in the appointment of a high commissioner to Canada found expression in the speech of Premier King, who welcomed Sir William and his wife and family to Canada on behalf of the government.

"Were I to express in a word my feelings as to the significance of the appointment to Canada of a high commissioner for Great Britain," said Mr. King, "I would say that I believe it is by far the most important step that has yet been taken to further effective consultation and co-operation between the government of His Majesty in the Dominion of Canada and the Government of His Majesty in Great Britain, with resultant benefits to both, and what is even more important to the unity of the Empire as a whole, the most effective means thus far devised of securing the Crown against involvement in any possible controversy which may arise between different governments of which His Majesty is the head.

If closer relations of the governments of the Empire and the maintenance of its unity through the security of the Crown are what we all desire, may we not truly say that here they find their surest as well as their latest development."

The creation of the post would serve to knit firmer and stronger the hands and bonds of the British Empire, in the opinion of Hon. R. B. Bennett, Conservative leader, who joined with the Prime Minister in his words of welcome. No political differences could make the people of Canada depart from their firm devotion to that community of nations which made up the British Empire and which had become an assurance of peace in the world. Canada was prepared to extend to Sir William all that children would give to the representatives of their parents.

"If one required a new motto for the empire it would be 'Liberty, Equality, and Co-operation,'" said Sir William Clark in the course of a speech in which he thanked the government and people of Canada for their welcome. Sir William made brief and modest reference to his own selection for the position.

"I am not going to be so foolish or arrogant as to suggest that my appointment will eliminate the barriers

of space and time and all the difficulties they involve," he said, but at least it will introduce into the relations between the two governments, on this side of the sea now, as well as on the other, that personal element which experience has shown is so important in the handling of affairs."

### Serious Famine In Russia

Mobs In Moscow Are Openly Denouncing the Government

London, Eng.—Soviet Russia is in the throes of a famine which is reaching serious proportions, according to reports from Helsingfors and Riga received by the Exchange Telegraph Company here.

Mounded police are patrolling Moscow and dispersing near-violent mobs whose leaders openly denounce the government, the Helsingfors report stated.

Foreign legations in Moscow are perturbed over the seriousness of the situation, although some, it is said, are disposed to welcome it because it affords them a legitimate reason for leaving.

In Leningrad similar scenes were enacted, according to the Riga report. There 750 women and children, after waiting in a bread line all night, were given apples. Angered, they used the apples to bombard the windows of food stores and threatened to lynch the food distributors. A large number were arrested and later released.

### Commission May Probe Grain Trade

Alleged Grain Mixing At Terminals Is Causing Dissatisfaction As To Grade

Regina. Appointment of a commission to investigate the grain trade and secure the facts regarding the effect of the mixing of grain at the terminals is planned by the Saskatchewan Government, Premier J. G. Gardiner has announced.

"In view of the widespread dissatisfaction with the grading of wheat and the repeated reports to the effect that mixing at terminals has resulted in the lowering of the standard of the Canadian wheat certificate in Europe," said Premier Gardiner, "the Saskatchewan Government is considering the appointment of a commission to conduct a thorough investigation into the grain trade."

### Held Lucky Ticket

Quebec Bank Clerk Wins \$35,000 On Handicap

Quebec. Fred G. Moore, 18, a clerk in the employ of the Imperial Bank here, won the first prize of the Army and Navy Veterans' pool on the Cambridge Handicap. His prize will amount to about \$35,000. He drew Palais Royal II, winner of the race.

Fred Graham, Pontypool, Ont., who drew Baytown in the pool, will receive about \$11,800 as second prize.

E. A. McLatchey, New Glasgow, N.S., holds the ticket on Insight II, placing third. McLatchey will get \$5,900, the amount of the third prize.

### Ship Reports Having Sighted Moth 'Plane

MacDonald's Tiny Aircraft Was Speeding Eastward When Seen

Antwerp, Belgium.—The men who caught the last glimpse of the ill-fated Moth aeroplane of Commander H. C. MacDonald, as the tiny aircraft was ambitiously speeding eastward from Newfoundland on the night of October 18, have just paid a visit to this port, and told in simple words the story of their brief touch with the daring airman, so soon to vanish into mystery.

Captain Kellogg and his crew of the steamer Hindenberg arrived here after a slow voyage from Montreal. Chief Officer William Fennega, who was on watch on the deck at the time the plane was sighted, said:

"It was exactly 11 p.m. when I heard the noise of a plane's motor. It didn't take me long to make out the plane's position in the sky for the machine was flying at not more than 500 to 700 feet altitude and was distinctly visible thanks to a red-colored trail which the burning petrol in the motor left behind. On the plane itself no light was to be seen."

"We watched the plane closely to see whether the flyer was intending to signal us. It seemed certain he sighted us, as the weather was clear. There was no sign from the machine, however. There was no indication that the flyer was in any difficulty."

"Our position at that time was about 600 miles from Newfoundland."

### Brilliant Meteoric Display Predicted

Shooting Stars Will Be Seen From November 10 To 17

Montreal.—Meteoric displays of striking brightness are predicted to occur for a period lasting from Nov. 10 to 17 inclusive, according to an announcement from Harvard College Observatory, received at McGill, by Prof. A. Vibert Douglas, lecturer in physics and secretary of the Montreal centre of the Royal Astronomical Society of Canada.

These displays, commonly known as shooting stars, will be seen in the northern sky south of the constellation of the Great Bear, better known as the Dipper. The shooting stars will be best observed after midnight until four o'clock in the morning, and will be seen as bright flashes across the sky.

### Militia Officers Committed

Hamilton, Ont.—Three officers of the Third Canadian Machine Gun Battalion, one of whom is alleged to have drawn his sword on a police officer, were committed for trial by Magistrate Jelfs, on charges of assaulting two police officers who arrested them at the Thistle Club.

### Patrol Highways

Regina, Sask. Policemen mounted on motorcycles patrolling Saskatchewan highways were foremost at a meeting of representatives of all the important centres of province, or vice-presidents of the Safety First League.

### IMPORTANT ANNOUNCEMENT

Dr. Henry Marshall Tory, president of the national research council of Canada, who forecasts that at a gathering of bacteriologists in Ottawa, in the early winter an important announcement will be made concerning mankind's age-long fight against tuberculosis in animals, one of the deadliest scourges known, and one generally conceded the cause of a great deal of tuberculosis in human beings.

### Newfoundland Elections

Latest Returns Show That Government Has Been Defeated

St. John's, Nfld.—The opposition party of Sir Richard Squires overthrew the government of Hon. P. C. Alderdice in the general elections it became known when the results from twenty-nine of the thirty-seven districts had been received.

The election of the opposition candidates in St. John's City West and one opposition member in Lunenburg was conceded in the latest returns, while two seats in St. John's City East, and one in Lunenburg, were conceded to the government.

The opposition party has now secured twenty-three of a total of forty seats and nine government supporters have been returned.

Both Sir Richard Squires and Hon. P. C. Alderdice were elected. Sir Richard ran in Lunenburg while Premier Alderdice contested St. John's City East.

### Giles May Have Own Aerodrome

London, Eng.—An aerodrome in every city in Britain is the program put forward by the air ministry. Realization of the program depends on the city councils finding the money and therefore it will not be immediate. Manchester and Nottingham have already purchased land for aerodromes and Leeds, Hull and Liverpool are expected soon to follow their example.

### Cut In Tire Prices

Toronto. Automobile tire price reductions ranging from 2½ to 8 per cent. went into effect throughout the Dominion on the anniversary of the discontinuance of the Stevenson restriction plan by the British Government. Other rubber goods are not affected.

## Purchase Of Labrador By Canada Is Seen As A Possibility

### Famine Stalks In China

Babies Being Killed On Account Of Lack Of Food

Shanghai, China.—The Chinese international famine relief is being flooded with appeals from the stricken districts, particularly in Shansi, where, it is declared, "babies are being killed because there is nothing to feed them with and children are being sold for a mere song."

Thousands of persons are said to be living on the bark and leaves of trees. In addition to Shansi the famine includes districts in Kwangsi, Szechuan, Hupeh, Hunan and Honan.

A magistrate of Yang Hsien in a letter estimates that there are 200,000 famine sufferers, owing to the drought and the devastations of the "Red Spears" a guerilla organization. The situation in Shansi, the magistrate declares, is unprecedented, children being sold openly in the market by parents eager for cash. In Hunan thousands are on the verge of starvation, due to the banditry, communist uprisings, the Red Spears and drought.

### Remain In Canada

5,000 British Harvesters Still Remaining In Canada

Ottawa. With harvesting operations completed in the west and with 5,000 British harvesters still remaining in Canada, it is probable that the majority will become permanently established, department of immigration officials stated today. Reports from steamship companies to the department indicate that approximately 3,500 have returned to the British Isles.

From the fact that very few of the harvesters have applied at government employment bureau officials at the labor department believe that in the majority of cases they have found permanent work on western farms.

### Attempt To Solve Mystery

Winnipeg. Professor Maximilian Langsner, Viennese criminologist, has accepted an invitation extended by a local newspaper to attempt to solve the mysterious disappearance here of Julia Johnson, five years old. The girl disappeared here six months ago and rewards totalling \$1,150 have been offered by the city and province in an effort to trace her.

### Communists Arrested

Warsaw, Poland. Police arrested 45 leaders of an illegal Communist party in western Ukraine, it was announced here.

Ottawa. Some interest has been aroused here by the statement contained in a despatch from St. John's, Newfoundland, that one of the results of the change of government in Newfoundland will be the sale of Labrador either to Canada or to an American syndicate. It is pointed out, however, that confusion might arise from such a statement, because the sale would be vastly different if it were made to Canada than if it were made to the United States interests.

In the former case, it is stated, Canada, on the payment of the stipulated amount, would acquire Labrador. Labrador would thereupon become part of the Dominion, either being annexed to the province of Quebec or remaining as a distinct province or territory.

In the event of sale to U.S. interests there would, of course, be no change in sovereignty. Even if the Crown lands, pulp rights, or any other of these things pertaining to Labrador, were disposed of to an American syndicate, the country would still remain a part of Newfoundland and of the British Empire. All that would happen is that U.S. interests would acquire control of the resources to exploit them as they saw fit.

On the basis of the statements contained in the St. John's despatch it seems likely that negotiations will be entered into for the sale of Labrador to Canada after Sir Richard Squires assumes office.

There has already been litigation involving the Dominion of Canada the province of Quebec and Newfoundland with respect to the Labrador boundary. This was carried to the Privy Council in England for final settlement.

### Armistice Medal Struck

Issued At Royal Mint To Commemorate Tenth Anniversary

London, Eng.—To commemorate the 10th anniversary of the armistice on November 11, the mint has struck a special medal for public issue. It is obtainable at the Royal Mint in silver and bronze at \$7.50 for a large bronze one, \$2.50 for a medium bronze one, and 42 cents for small bronze ones.

On the face of the medal is the figure of Britannia supporting a young warrior with sheathed sword and the broken shackles of war, offering a wreath of laurels to the memory of the fallen. The reverse shows the cenotaph surrounded by the inscription: "Their name liveth for evermore."

## Hon. James Malcolm Talks to Cardiff Over Trans-Atlantic Phone

Ottawa, Ont. Ten thousand people who thronged the grounds of the Cardiff Empire Exhibition, in Wales, and many thousands more throughout the British Isles, heard Hon. James Malcolm, minister of trade and commerce, speak to them from Ottawa over the trans-Atlantic telephone.

"Simply marvelous reception," the word came back from Cardiff, as soon as the minister had finished his eight minute address. "The best yet."

Mr. Malcolm's office in the parliament buildings was the Ottawa "call station."

Mr. Malcolm introduced his brief address by expressing the regards of the Canadian people to the people of Wales, and declared that the ideal of empire trade for which the exhibition stands was finding strong and patriotic support in this country. The minister voiced a word of praise for the empire marketing board. Trade, he said, was only a medium through which the people of the empire became acquainted and through which were learned the difficulties and viewpoints of the various units. To know one's self was essential, to know one's country was a patriotic duty, to know the empire was a great and profitable advantage.

The minister made passing reference to the arrival in Canada of the prime minister from his lengthy sojourn abroad, and expressed Mr. Mackenzie King's thanks for the reception tendered him in Great Britain.

"The question of inter-imperial migration has been much to the force in recent months," said Mr. Malcolm.

"While calling your attention to the speech delivered by our prime minister recently, in London, in the course of which he declared that Canada welcomed British emigrants, may I say that British North America has in recent years been receiving as many British emigrants as are going to all other empire countries."

The return movement is relatively small, indicating that the great bulk of those who come to us are satisfied with their welcome and with the opportunities which Canada affords.

opportunities which have never been greater than today. In the year 1922 we received and welcomed 627 Welsh emigrants; this year we are receiving over 500 every month. If an inter-empire problem exists on the question of migration, may I say for the government and the people of Canada that none are more welcome in this Dominion than the sons and daughters of the British Isles."

The minister concluded with a reference to the Prince of Wales, whom Canada claimed as "a bonded proprietor and taxpayer of this Dominion." His Royal Highness was the great ambassador of the empire, representative of all our common traditions, common history and common ideals for a United Empire. The Prince of Wales was a joint possession.

Mr. Malcolm closed with a wish that the Cardiff Empire Exhibition might meet with unprecedented success.

## Labor Party Makes Gains In Municipal Elections Held In England

London, Eng.—Labor leaders are elated over gains made in the municipal elections in the cities and towns throughout England. Incomplete returns indicate that Labor candidates have made a net gain of 101 seats on municipal councils outside of London while their principal opponents registered a loss of 71, and independents a loss of 21.

Results of the elections created exceptional interest this year, some leaders professing to believe that the vote would indicate in some degree what could be expected at the general elections throughout the country next year.

Labor gains, partial returns indicated, were made largely at the expense of Conservatives. At Twickenham the Labor party gained three seats from Conservatives. Twickenham is the parliamentary constituency of Right Hon. William Joynson-Hicks, home secretary.

A feature of the elections in London was the candidature of 450 women as compared with 343 who stood for office in 1925.

The 1925 elections resulted in the return of 140 of the women candidates. While returns from the elections are far from complete it is known that a number of the women headed the polls in their districts. Seven women have been elected to the municipal council of the borough of Poplar. The 21-year-old daughter of the mayor of Fulham was elected.

Unemployed men run for office in a number of the boroughs and this type of candidate fared worst at Southwark and Shoreditch. Three Communist candidates at Deptford were badly beaten. The mayor of Hornsey was defeated in his own division.

Princess Mary and Lord Lascelles are shown above at the doorway of their Portunna castle, in Ireland, where they were accorded a royal welcome upon their recent visit. Shortly before their arrival the stables of the castle were set afire, apparently by a fanatic, but Lord Lascelles requested that no punishment be meted out to the culprit.

## Leasing Of School Lands

New Policy May Be Adopted By Department Of Interior

The new policy of the department of interior in regard to leased school lands affects only cultivated lands which have been abandoned or relinquished and will not become effective until 1910. Charles Stewart has obtained approval of the three provincial governments thereto. Mr. Stewart already has interviewed the Saskatchewan and Alberta governments and has obtained their consent.

The new policy will affect approximately 1,000 parcels of land in the three prairie provinces, most of which are in Alberta and Saskatchewan, and only a few in Manitoba. The weakness in the administration which the policy is designed to correct is rather involved but may be explained as follows: The school lands are administered by the interior department as the trustee of the provinces. No sales of school lands are held or made without the consent of the provinces. Since these sales are by public auction it is advisable frequently to wait until a demand is felt. In Manitoba, for example, there have been no sales for several years.

In these periods it has been the policy of the department to lease school lands for various purposes such as grazing and haying. However, the land must not be cultivated. In recent years a problem arose in regard to land which had been sold and subsequently abandoned. Sometimes the purchaser was put off the land, because he could not meet his payments and other times he walked off of his own volition. These lands, of course, had been cultivated and with no occupant in charge these farms began to grow up in weeds. It becomes a problem and it was decided finally that in between auction sales, and sometimes years elapse, these cultivated lands should be leased for cultivation at fifty cents per acre per year. The leases were to run only for one year. This solved the weed problem but occasioned another. In granting leases the department always gave the farmer who was surrendering the land the first chance and it was found that many farmers were purposely relinquishing their farms in order to get the lease. If a man had 100 acres and bought it at \$10 per acre he would have to pay \$1,000 over a period of twenty years or \$50 per year. But in addition to the annual payment he had to meet interest on the unpaid balance. If he relinquished his farm and took a lease he paid fifty cents per acre or \$50 per year. He had no interest to meet at all. Then if the farm were put up for sale, he could buy it, pay \$80 as his first payment and relinquish it once more and get on the lease business. In order to meet this situation, Mr. Stewart is recommending that a new policy be inaugurated, whereby cultivated lands reverting to the crown will be sold again immediately, and not held up indefinitely until the times are thought to be especially favorable. There are only a few parcels coming in year by year and the loss in sale price would not be very great. If the land cannot be sold, the proposal is to lease it temporarily until it can be sold, and not to give the farmer who is relinquishing the land the first claim on the lease. It is thought that this will put a stop to the practice by which settlers have evaded purchase and got on to leases.

### Missed His Opportunity

The Blarney Stone was kissed by the Sultan of Muscat, when he made a trip to the famous Blarney Castle during his visit to Cork. Several pretty collections showed evidence of disappointment when the Sultan did not carry out the rest of the custom, under which he should have turned from the stone and embraced the first collection that met his gaze.

One-half of the world can't see how the other half of the world can possibly live without it.

"Erwin has been bitten by a snake, and so I gave him a strong cup of my coffee."

"Ah, yes as a counter poison!"

Lustige Blätter, Berlin.

N. W. U. 1758

## Preserve Contact With Canada

Purpose Of Young Ambassadors Club Formed In Britain

Determined to preserve the contact they made with Canada and the Canadian people, and to keep informed on the development of the Dominion from time to time, in order that they might continue to spread the gospel of the opportunities afforded young people in this country, the members of the Young Ambassadors of Empire Party which recently toured the Dominion have formed a Young Ambassadors' Club, with headquarters in London, according to advices received at the Montreal offices of the Canadian National Railways, who sponsored the Canadian portion of the tour.

The club is being formed under the direction of Frank L. Lescot, of the Allied Newspapers of Britain, who originated the empire travel and scholarship scheme under which the 50 British boys and girls were given the tour to Canada.

The purpose of the club will be to keep alive the contacts made in Canada to keep the members reliably informed on opportunities for young people in the Dominion, and to preserve the spirit of the empire travel scheme which is to be extended in future years by the Allied Newspaper group to other sections of the British Empire. The 50 "Ambassadors" who completed their five weeks remarkable tour of the Dominion are constituted charter members of the club and John Mackman, of London University, who was one of the party, has been selected general secretary.

### Making World Tour In Yacht

In a small yacht measuring only forty-four feet in length and weighing only eighteen tons, Mr. Dick Moff and his bride have left Potchefstroom, South Africa, on a honeymoon tour around the world.

Mr. Moff is the grandson of the late President Kruger. The couple will stay at any port or country just as long as fancy dictates. Only a crew of two will accompany them.

"Now do you really think you'll be satisfied with me as a mother-in-law?"

"Madame, it was to obtain a mother-in-law like you I fell in love with your daughter."

## NEW APPOINTMENT

MR. V. IRVING SMART

who was recently appointed general superintendent of transportation, western region, Canadian National Railways.

## Increase In Canada's Revenue

Advance Shown In First Five Months Of Fiscal Year

Ordinary revenues of the Dominion of Canada increased by \$14,350,291 during the five months of the fiscal year ended August 31st last, as compared with the corresponding period of last year. The financial statement issued by the Department of Finance shows that on August 31st last, the ordinary revenues of the Dominion totalled \$201,118,541, while for the five months ended August 31st, 1927, they amounted to \$186,768,250. The net debt of the Dominion shows a decrease of \$5,106,593 during the month of August, the decrease in August, 1927, being \$11,250,727.

### Activity In Aeronautics

Increased activity in flying in Canada has led to the establishment of flying schools by commercial firms, to fill the growing demand for pilots and air engineers. The Department of National Defence, to encourage the popular use and knowledge of aeronautics, is assisting in the establishing of flying clubs in the principal cities of the Dominion.

## Difference Of Altitude In Southern Alberta

Maximum Of Ten Thousand Feet Between Boundaries Of Province

What are the lowest and highest points in the southern part of Alberta?

The Topographical Survey, Department of the Interior, has just issued a map of the southern part of Alberta showing elevations above sea level by means of contour lines. The map extends north from the international boundary to township 42, and covers the province from east to west. The contour lines are shown for every 200 feet difference in elevation except for elevations over 8,000 feet where the contour interval is 1,000 feet. The scale of the map is twelve and one-half miles to an inch and on this scale only the larger natural and cultural features are shown including lakes, rivers, larger streams, notable mountain peaks, railway lines, stations, and park, forest reserve and Indian reserve boundaries.

The lowest elevation in this part of the province is at the Red Deer River where it crosses the east boundary of the province at Empress, where the water level is slightly less than two thousand feet above sea level. The highest point is the crest of Mt. Columbia, on the west boundary, which reaches 12,294 feet. There is thus a maximum difference of altitude of over 10,000 feet between the two boundaries of the province.

### Sodium Sulphate In Canada

The production of sodium sulphate from the natural deposits of Western Canada is still in its infancy. There is a fairly steady market for around 40,000 tons of salt cake in the pulp and paper industry, but the largest consuming centres are in Eastern Canada and the present freight rates from the deposits to the market are an important factor.

### Liquor Brings Trouble

Five men committed from Canada, who were arrested by U.S. customs inspectors when their dinner pails were found to contain liquor they had carried across the Detroit river border as they came to work, were ordered excluded from the United States for one year by an immigration board of special inquiry.

## The Poultry Ration

Skim Milk Found To Give Better Egg Production

In a feeding test at the Fredericton, New Brunswick, Experimental Station, fowls proved more valuable in the ration than an equal amount of beef scrap. In the same experiment skim milk proved superior to either beef scrap or fishmeal. The test was carried on for a six months period, ending at the end of May last year. Each of three pens was made up of fifteen barred Rock pullets. The scratch grain mixture consisted of two parts cracked corn, two parts wheat, and one part oats. The dry mash was made up of 100 pounds of wheat bran, 100 pounds wheat middlings, 100 pounds cornmeal, 100 pounds crushed oats, and 5 pounds of charcoal. This mixture was uniform for all the pens but one of them received in addition 45 pounds of beef scrap. Another received skim milk fed at a rate of a quart daily for fifteen birds, and the third received 45 pounds of fishmeal. Records were kept of the eggs laid, their value per bird, and the returns per bird over the cost of feed. The cost in feed for the eggs laid amounted to 21 cents per dozen for those getting beef scrap; 16 cents per dozen for those getting skim milk, and a fraction over 16 cents from the birds getting the fishmeal. The average value of the eggs per bird was \$2.75 for the beef scrap lot, \$3.44 for the skim milk pen, and \$3.26 for the birds getting the fishmeal. The profit on the birds was on a corresponding scale. It is further shown in the report, which is published by the Department of Agriculture at Ottawa, that the mortality in the chicks at three weeks of age was highest from the birds getting the beef scrap, amounting to almost 43 per cent. The lowest were those from the eggs from skim milk fed birds amounting to 10 per cent., whereas the mortality from the eggs from the fishmeal fed pen was midway between, amounting to 22.85 per cent. Experiments during three years showed that skim milk has given better egg production and a larger profit than beef scrap.

## The Foreign Born

No Race Or Nationality Has A Monopoly Of All The Virtues

When the Canadian Clubs in convention at Calgary expressed strong disapproval of the stirring references that have been made to citizens of non-British origin they did a useful thing for the country. The protest should have some effect in checking an intemperate form of speech that has, in some cases, been indulged in by persons who gave the matter no reasonable and fair consideration. It is natural enough that people of British stock should entertain the notion that there is no stock quite equal to their own. This notion is instinctive in every race, and in none stronger than with us. Nationalities, as distinct from races, feel it and thrive on it. In its right place and not too offensively proclaimed it has its merits.

But the fact is that no race or nationality has anything like a monopoly of the merits and virtues. There is courage and worth and everything desirable to be found in every people everywhere, and all this has been demonstrated and is better known in these times than ever before.

In Canada all this should be better known, perhaps, than elsewhere because the presence of foreign-born people is no new thing in this country, and many of the great and fine things that have been done have been done by these people.—Toronto Star.

### Took No Liberties

"Well," said Edith's mother, when the child arrived home from the tea-party, "did you have a good time?"

"Yes, thank you, mamma."

"And did you play nice games?"

"Yes, mamma."

"And did you have a nice tea?"

"Yes, mamma."

"I hope, Edith, that you behaved yourself like a little lady. You didn't take any liberties, did you?"

"No, mamma. There wasn't any on the table."

### Gold In Canada

The chief sources of Canada's gold production continue to be the gold quartz ores of Porcupine and Kirkland Lake, Ontario; the copper-gold, sulphide ores, and the quartz veins of British Columbia; and the placer deposits of Yukon. A small amount of placer gold is obtained also in British Columbia. Lode gold is recovered from quartz veins in Nova Scotia and Manitoba, and as by-product of the treatment of copper ores in Quebec.

Nothing puts a man out quicker than the knowledge that he has been taken in.

## Suspend "Class" Rate On Tea

New Tariff Would Increase Cost To The Consumer

Complete suspension of railway freight tariff item 250-A, in supplement 21, which placed tea imported from Vancouver to points in western Canada under a "class" rate, thus creating a large increase over the previous "commodity rate," was ordered by the board of railway commissioners in a judgment handed down at Ottawa. The judgment deals exhaustively with the representations of the various boards of trade throughout the west who protested against the proposed change, and also with the testimony of eastern Canada tea importers who urged that the change be made effective.

The "commodity" rate which provided for a charge of \$1.50 per cwt. on carload lots, and \$2 per cwt. on less than carload lots of tea shipped from Vancouver to prairie points, had been in effect since 1915, but in 1926 a new tariff was designed which cancelled this rate and put tea imported through Vancouver under the "class" rate—a classification which would have had the effect of increasing the tariff to as much as \$2.51 for carload lots, and \$3.72 for less than carload lots.

At the hearing given by the board it was urged that the new tariff would increase the cost to the consumer, while as against the eastern Canada tea importers favored the tariff on the ground that it would give them an opportunity of competing in the western market. After hearing all representations the board ordered the cancellation of the proposed new tariff and the continuation of the old.

## Has Commercial Value

Education Pays Important Part In Amount Of Income

An investigation made of the incomes of more than 7,000 men by a national professional commerce fraternity leads again to the conclusion that education pays. Rather a direct connection is established by this study between the amount of an individual's education and the amount of his income.

That, of course, does not mean spends a small fortune in education will necessarily forge his way into the high income class. There are exceptions to all rules and there are individuals who, in spite of excellent education, fall somehow to get ahead.

But in a group of 7,000 men the rule prevails over the exceptions. And the conclusions of this investigation bear out others based upon a smaller number of cases.

The position of the cynic on the value of education, high or otherwise, becomes progressively more difficult. Sufficient data are now coming to hand to demonstrate with a measure of scientific accuracy that education has a distinct commercial value, whether secured with that as the primary consideration or not.

### Invention May Bring Fortune

An old-time "desert rat," George Campbell Carson, who after years of litigation with copper companies over a patent used in smelting furnaces, may at last reap a reward of millions from his invention, according to word from San Francisco. His attorneys said that the one-time prospector is in a position to collect approximately \$20,000,000, though he may not get it all as several capitalists financed his claim and must be recompensed.

### Automatic Post Office

Miniature post offices where the public may buy a stamp, post a letter, and then step inside and telephone, will soon be erected in London, and later in provincial towns. The scheme is a development of the present telephone kiosks, and fifty of the new boxes are being constructed. An automatic stamp machine and pillar box will be outside.

It's a signal triumph for the weather man when his prediction happens to come true.

"My hats last three years. The first year I change the ribbon, and the next year I change the brim."

"And the third year?"

"I change the hat in a restaurant."

Pages Gales, Yverdon.

## ANCIENT MUMMIES FOUND IN FAR NORTH

With finds which they believe rank with those of King Tut's tomb in antiquity if not in splendor, nine members of the Stoll-McCracken Expedition of the American Museum of Natural History reached Montreal over the lines of the Canadian National Railways from Prince Rupert, B.C., where they left the Schooner "Ella M. Morrissey" which had carried them through the Arctic waters. The party consisting of Charles Stoll, of New York, backer and director of the Expedition and his wife, a noted big game huntress; Harold McCracken, Associate Editor of Field and Stream and leader of the expedition; Dr. H. E. Anthony, Curator of Mammals of the American Museum and other Museum experts, left the port of Prince Rupert on May 1st, for northern waters, and were at one time 225 miles north of Point Barrow. Their search was for ancient mummies believed to be of Stone Age men, whose presence on the barren islands of the Aleutians group had been reported.

On a barren island, far from the present haunts of men, a burial was discovered in which were four bodies in a rude sarcophagus, constructed of driftwood, cleverly mortised together and held by nails made of walrus bone. The mummies were those of a chieftain; his hunter who was sent on the long journey with him to provide game for his food; a seamstress who had her sewing equipment for repairing the chief's garments, and a child believed to show the chief's love of children. Beside the body of the hunter, were the stone hatchets and harpoons of his craft. The mummies were splendidly preserved and showed every indication that the people of the Asiatic races, from which these "Stone Age" men were believed to have come used methods of preservation similar to those of the Ancient Egyptians in preserving the bodies of their Pharaohs. The four mummies, including the trunkless head of the hunter which is shown here in the hands of Harold McCracken, leader of the Expedition, travelled to Montreal with the party on the Continental Limited of the Canadian National Railways and will be placed in the American Museum together with the important groups of mammals and birds of the Arctic waters which the party secured during their expedition.

Photographs show the members of the party on their arrival at Bonaventure Station, Montreal; the mummified head of the hunter brought back by Mr. McCracken, and "Tough," a member of the party and the only English bulldog which is known to have ever sailed Arctic waters, enjoying a look out from the cab of the Canadian National Railways locomotive which hauled their train into Montreal.—Canadian National Railways photograph.

#### CHAPTER V.—Continued.

"Can I cook?" repeated Andy. "E asks me can I cook! That's me first name; that's me profession. I've cooked on sailing ships, steamboats, in camps, in the Army, and I did thirty days in Sydney jail, and bilme me if they didn't make me 'ead cook. I was so good they wanted me to stay."

"You're hired, Andy," said Douglas decidedly. "But isn't it going to be pretty tough to quit the boxing game for cooking?"

"Seem' as you 'ave asked me I'll say that it's a blinkin' sight better than quittin' it for liddledy-winkles!"

Douglas came to his feet. "I want you to meet Dad, Donald, and we'll find out when we are to start."

Andy patted his stomach contentedly. "Well, with this 'ere champagne under me belt, I think I'll start in 'ere and 'ave a drink and a fight in every bar from 'ere to Cordova Street. About meetin' you Donnie," he added scratching his head reflectively, "the way I feel right now I think by tomorrow morning you'll find me in the bridal-chamber of the Vancouver Hotel." Saying which, with straightened shoulders, his head set at a characteristic angle, he swaggered down the street and with a wave of his hand disappeared within the swinging doors of the first saloon. In his present mood Andy envied no millionaire.

"You'll like Dad," said Douglas, as they ran up the steps of the big office building. "He's rather severe looking and pretty straight-laced, but the face he wears in the office isn't the face he wears at home." He finished with a laugh.

Robert Rennie was the sole owner of the Rennie Construction and Logging Company, one of the largest organizations of its kind on the Coast. He now rose from his chair and came around the desk, all the while studying Donald's face, which bore unmistakable traces of the afternoon's fight.

"Dad, this is Donald McLean, whom I told you about last night. I don't want to take up much of your time; just wanted you to meet Donald and find out when we can start on the trip to the mountains."

"Now that Gillis is here to go with you, you can go any time; the soon-

er the better, as we expect to have the railroad to the summit in a few weeks," responded his father, his eyes still on Donald.

"Thanks, Dad," said Douglas. "We can be ready tomorrow and leave the next day."

"Douglas, will you please go to Bowser's office and get some papers he promised to have ready today?" asked Robert Rennie.

Donald moved toward the door with Douglas.

"Sit down, Mr. McLean, and wait until Douglas comes back," invited Robert Rennie politely, as he pushed a chair toward Donald. He then closed the door of the outer office, where a girl sat pounding a typewriter.

When the older man turned his face was set in a broad smile and he crossed the room to seize the hand of his astonished visitor in a hearty grip. "Man! man!" he exclaimed, as he pumped Donald's hand vigorously, "that was a great fight today! When you got Garreau with your left in the second round and that d—gong rang, I—I—heavens, but I was excited!" He was gazing at Donald with admiration glowing in his eyes.

"You—you were there!" gasped Donald.

Robert Rennie chuckled. "Top row nigger heaven! When that brute fouled you I think I could have shot him!"

"Mr. Rennie, I'm not a professional fighter, I—I—"

"Tut! tut!" interrupted the enthusiastic fan "I can see that. By gad! that last round was a whirlwind. That right you landed on his jaw—I got so excited that I fell down between the seats and skinned my shins." He rubbed his leg ruefully. "I never saw such speed as you showed in that last round."

Here footsteps sounded outside. Robert Rennie moved quickly to his chair, adjusted his glasses and assumed a serious expression. "Not a word to Doug," he whispered.

"Bowser says that he told you he'd have the papers tomorrow," informed Douglas.

"Very well," answered his father. Donald turned as he was leaving the room and saw Robert Rennie close one eye in a wise wink.

#### CHAPTER VI.

At the breakfast table next morning Douglas was talking happily of their departure for Summit Lake.

"You'll have to hustle the work of timber cruising," his father admonished. "There won't be any time for play, as we expect to have the road finished in a few weeks."

"Don't worry, Dad. This is my

first real job, and I am going to make good," declared Douglas stoutly.

"I hope so, Douglas. As you know, I want you to work your way up on your own merits. I'm not going to show any favoritism. We are going to put in a larger mill at Cheakamus, and one at Summit Lake, so there will be good opportunities for advancement for you and McLean if you show the right spirit."

"Is Mr. McLean going with you?" interposed Janet in a casual tone.

"Yes."

"How can he leave his business for so long?"

"He's not actively engaged in business just at present," explained Douglas glibly.

"You might ask him out to dinner tonight. I am having a few friends in for the evening."

"You bet I will."

Donald accepted Janet's invitation with alacrity. Living within four walls of a room and eating in restaurants had long since pallied on his taste.

"Formal or informal?" he asked.

Douglas made a deprecatory gesture. "Formal, very formal. You don't know Janet or you wouldn't ask that question. My sister is a stickler for ceremony. How are you off for 'soup and fish'?"

"I have the necessities," smiled Donald.

Donald spent more than the usual time in dressing. He stood before the small mirror and surveyed himself with a critical eye. "Pretty soft for you," he apostrophized himself, "eating in ten-cent restaurants one day and dining in a millionaire's home the next, and on the invitation of the most beautiful girl you have ever met."

Douglas called for him with his car and whisked him to the palatial Rennie residence on Shaughnessy Heights. The imposing evidence of wealth was written in bold headlines on the whole street of beautiful homes.

Mrs. Rennie met them at the door and greeted Donald warmly. He could not repress a start as he noted her likeness to Janet, and when she spoke her voice held the same deep tone as her daughter's. She led him to a large room flanked by two enormous bays that looked out on the Avenue. There was a spaciousness in all the rooms, a rare combination of beauty and good taste in the furnishings, that were luxurious without being ornate. Robert Rennie came forward and gave him a cheery welcome. Donald heard Janet's voice behind him and turned to gaze on a vision of loveliness.

Janet had dressed for the occasion with unusual care. A dark red evening gown of a filmy material showed to advantage the delicate contour of her form and the graceful curve of her snow-white shoulders and neck. Her lovely hair was wound in shining coils and held with a comb that sparkled with small but brilliant diamonds. Her long dark lashes drooped, and she flushed slightly as she met Donald's look of undisguised admiration.

Mrs. Rennie was an excellent hostess. Her cultured and charming personality put Donald quite at ease. It seemed ages since he had worn a dress-suit and been entertained in a home of luxury and refinement. After the coarse fare of noisy restaurants which had been his, the excellent food, the rich linen, the home-like atmosphere and the subdued voices now gave him a pleasant thrill.

The conversation during dinner was on various subjects. At times it swung perilously near to matters pertaining to Donald's personal affairs. On such occasions Douglas adroitly shifted it to other channels.

Janet studied Donald covertly. His perfect poise, his air of refinement and his evident lack of self-consciousness impressed her. "He is cultured and well-bred," she thought as she noted his well-shaped head, his powerful shoulders and his clean-cut profile.

Near the finish of dinner, while waiting for coffee to be served, there came a lull in the conversation which was finally broken by Janet. "Doug tells me that you are engaged in the glove business, Mr. McLean," she stated.

Donald shot a quick glance at Douglas, but his friend's face was hidden in his handkerchief to smother a sudden attack of coughing. In spite of Donald's great effort at self-control, he felt a warm flush rise in his cheeks. What had Douglas divulged? Did his sister know of his participation in a boxing-match? He looked at Douglas appealingly. It was evident that he would receive no aid from that quarter, as that young man's assistance was a prolonged coughing that effectually drowned immediate conversation, but would have to stop sooner or later for lack of breath.

At this crucial moment Robert Rennie came to his assistance. "I would like Mr. McLean to witness a sunset from our roof," he said as he

rose from the table. "Let us have our coffee served there. The light will be gone if we wait longer."

As they ascended the stairs Donald gave his host a grateful look, which Mr. Rennie returned understandingly. That moment cemented an instant friendship in Donald's heart for this broad-minded Western millionaire.

From the eminence of the tiny roof garden the City, sliced with streets, lay at their feet. To the north the mountains were invested with a mystic blue haze, through which towered the snow-clad peaks. To the west lay the curving white sands of English Bay, and beyond, in the clear air of the long British Columbia twilight, they could see the strong mountainous profile of Vancouver Island.

"The topography of our City," explained Robert Rennie, "lying between Burrard Inlet and False Creek, is very much like that of New York on Manhattan Island. The Narrows are deep enough for the largest ship afloat, and the Inlet—a veritable inland sea—has unlimited room for docks."

"The name 'Narrows' seems a feeble word for such a magnificent spot," observed Donald.

"Quite true," admitted Robert Rennie. "It was only yesterday that one of our public-spirited citizens suggested the name 'Lions' Gate.'"

"Oh, Dad, that would be lovely!" exclaimed Janet, her eyes shining.

"The 'Lions' Gate,' with the two watchful Lions looking down on all who enter. The name is most fitting."

"Yes," concurred Douglas, "Canada being one of the Lion's whelps, what more appropriate name than 'Lions' Gate,' the western gateway to the British Empire?"

"The Creator was wonderfully kind to us in His allotment of mountains," said Janet's father; "mountains that are not only valuable for their scenic beauty, but for their mineral-filled rocks and forest-clad sides. Our bays, inlets and streams are filled with fish, and our climate is so mild on the Coast that man can live in comfort amid congenial surroundings the year round."

"Here we have the last of the Great West," continued Mr. Rennie. "With nearly four hundred thousand miles of territory, a coast line seven thousand miles in length, our population for the entire Province is less than one of the Coast cities to the south of us. Here in this vast untouched hinterland," swiveling his arm to the north and east, "lies a potential wealth that will support millions, a wealth that is awaiting the magic touch of capital and settlers—capital to provide railways; farmers to till the rich valley; miners to unlock the vast hoards of gold and copper; and loggers to fell the virgin forests. Some day—and that day is not far distant—all this will come to pass, and you young folks will see a railroad from Vancouver to the Behring Sea." The speaker's face was flushed and his eyes were glowing.

"Who knows," he finished dreamily, "but what the railroad I am building will be a link in the Alaskan road of the future?"

"Here is a family," thought Donald, "all native born, who have a deep and abiding faith in the destiny of the land of their birth."

Addressing Mr. Rennie, he said: "If the love that you and yours have for this Province is typical of the average citizen, I see no need to fear for the future of your country."

(To Be Continued.)

#### Canada's Gypsum Deposits

Gypsum is mined or quarried in Nova Scotia, New Brunswick, Ontario, Manitoba, and British Columbia, and in each of these provinces there are other properties capable of furnishing high-grade material when market conditions warrant their exploitation.

### ECZEMA ITCHED AND BURNED

On Arms and Legs Six  
Years. Cuticura Heals.

"When I was a small boy eczema broke out on my arms and legs in small pimples. As I grew older the eczema became wet and turned very red, and my clothing aggravated it. It itched and burned so that many a night I could not sleep. The trouble continued for six years."

"A friend advised Cuticura Soap and Ointment so I sent for a free sample. I found great relief after using it so purchased a cake of Cuticura Soap and a box of Cuticura Ointment which healed me." (Signed) Louis W. Plunz, 7128 Jasper Ave., Edmonton, Alta.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample sent free by mail. Address: Canadian Eczema Co., Montreal, P. Q. Price: Soap 25¢, Ointment 50¢ and 100¢, Talcum 25¢.

ECZEMA Shaving Stick 25¢.

THE GREAT HERBAL SKIN BALM

#### British Industries Fair

Increasing Interest Is Evidenced In  
Exhibit To Be Held In London  
and Birmingham

The British Government announces that the fifteenth British Industries Fair will be held simultaneously in London and Birmingham from the 18th February to the 1st March, 1920, inclusive.

The ever increasing growth of the Fair has necessitated the acquisition of further buildings at the White City to accommodate the immense and varied display of exhibits. At Birmingham new buildings of lasting strength have been constructed to meet the insistent demands for space. In this section alone over 400,000 square feet of space is available for the display of manufactured products.

In the fifteen years of its existence the Fair has developed to such an extent that it is now classed as one of the great trade fairs of the world.

At the White City the main lines shown include toys and games, leather and leather goods, pottery and glassware, wireless apparatus and accessories, clothing and textiles, food-stuffs, scientific, photographic and optical goods; stationery, jewellery, chemicals and druggists sundries, fancy goods and sports goods.

The Birmingham exhibit comprises hardware lines of all kinds, household appliances, electrical goods and machinery, including such varieties as concrete mixers, elevators and trucks, welding machines, heavy battery discharge testers, forges and blowers and many other types of industrial machinery.

In order to facilitate the rapid transaction of practical business the most thorough and modern system of organization has been adopted. In London the general public will be excluded from admission to the Fair during business hours. A special eluh for the sole use of buyers will offer many comforts and amenities and the free service of a corps of interpreters will render business relations easier between exhibitor and buyer.

Full particulars relating to the Fair can be obtained from the British Trade Commissioner, 703 Royal Bank Building, Winnipeg, who will be glad to issue invitations on behalf of the British Government to business men who contemplate making the trip.

#### THE SALIVA

You will recall how you came in hungry and saw mother's cooking on the table, so tempting. And you said, "It makes my mouth water."

Now, as a matter of fact, it probably did, for the mere sight or smell of savory food is sufficient to stimulate the salivary glands to function.

The role played by the saliva in tooth decay is a very important one. We have, first, the mechanical cleansing of the teeth and mouth structures by the saliva; how important it is then, that the food be palatable to stimulate the salivary flow and that mastication be thorough to the same end. For it is a matter of common observation, that in the quickly crumble away through decay cases of "dry mouth," the teeth

Now try this:

Chew for a few moments, some starchy food, a piece of white bread or potato. Notice presently, how sweet it tastes. What causes this?

In the saliva there is a content known as ptyalin, which has the power of converting starch into sugar and, which action takes place during the process of mastication, as the first step in the digestion of the starch element. But the ptyalin content performs the still further function of freeing the tooth surfaces of clinging pesty particles by dissolving the starch.

Then, too, you have observed how sticky orropy is the saliva at times. This is due to still another salivary content, the mucus. The function of this substance is largely the mechanical one of blinding the food particles together and at the same time of lubricating and making slippery, the surfaces of the teeth and mouth tissues, thus assisting in the act of swallowing.

Lastly, the presence of saliva with its constant renewal, tends to overcome through its neutralizing effect, the harmful action of fermentation of carbohydrate matter in the mouth. Hence, it is important for this reason too, that the supply be liberal.

Therefore, it is worthy of observation here, that great emotions, such as anger or fear, or the unpleasant

feeling of worry and vexation, tend to greatly check the normal salivary flow, and for this reason, if for no other, during the process of mastication, the mind should be swept clean of all such disturbing tendencies.

#### Little Helps For This Week

"I have learned in whatsoever state I am, therewith to be content." — Philippians iv. 11.

But those that are contented, However things do fall, Much anguish is prevented, And they soon freed from all.

They faish all their labors With much felicity; Their joy in trouble savors Of perfect piety.

—Anne Collins.

The fountain of content must spring up in the mind; and she who has so little knowledge of human nature as to seek happiness by changing anything but her own disposition, will waste her life in fruitless efforts, and multiply the griefs which which she proposes to remove.

—Ben Jonson.

#### Table Removed From Abbey

After remaining in the Jerusalem Chamber of Westminster Abbey for 50 years, the trestle-table, which had been placed there for the use of the revisers of the Bible, has been removed by the authorities. The work of the revisers was completed in 1881, but the table with its red balze remained until order was recently given.

The British custom of serving 4-o'clock tea in business offices is fast "taking on" in Canada. Many Canadian, as well as British-born, executives now order Red Rose Tea for their office staffs, because it is the same quality as the finest English teas. Sold by all grocers, in bright, clean aluminum.

# ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin;  
it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

**WEDDING BELLS**

The marriage of Miss Theodora Brandley to Mr. Earl Nelson, both of Stirling, was solemnized at the bride's home last Saturday evening with Bishop A. Fawns officiating.

The marriage of Miss Martha Audenaert, of Raymond to Mr. Kenneth Donaldson, of Lethbridge was solemnized in Lethbridge last Monday. Mr. Donaldson is in the employ of the Massey-Harris Co. Lethbridge.

Mr. David Bullock and Miss Elizabeth Schmidt were united in the holy bonds of matrimony at the Cardston temple yesterday. The newlyweds will live at Welling, where the groom operates a farm.

A quiet wedding was solemnized last Friday at Great Falls, Montana, when Miss Mandie Fleming, of Medicine Hat, became the bride of Mr. M. E. Christensen, of Lethbridge. The young couple will reside in Lethbridge where Mr. Christensen operates a funeral home.

Mr. and Mrs. S. B. Card entertained at a Thanksgiving party on Monday. Cover was laid for sixteen. The table was decorated with white and lavender chrysanthemums. At the close of the dinner Mrs. Card presented each guest with a favor, the ladies with georgette handkerchiefs and the men with comic novelties.

W. S. Ryan and A. W. Jopling, both of Champion, were fortunate in escaping serious injury when their car dove over the concrete bank into the mud and water, where a bridge was being repaired just east of Raymond. Someone had knocked the detour sign down and Mr. Ryan, who was driving, was unaware that the bridge was gone until it was too late. Mr. Ryan suffered a broken nose, and Mr. Jopling a severe bruise on the head, surprisingly little damage was done to the car, in spite of the fact that the car turned completely over.

All performances of the Chautauque were well attended last week. Members of the committee report a financial surplus. Sufficient signs were obtained to insure their return next year.

Snow and dog teams are lacking in "His Majesty" a seven reel film produced by British Canadian Pictures Limited of Calgary, stated Guy Weale, general manager of the company. The mountain scenes shot around Banff and Lake Louise are the finest backgrounds possible for an outdoor picture, he said. The Governor General and Lady Willington appear in the part showing the Calgary Stampede, and 800 horses are used in a round up scene in this all Canadian film.

An interesting and remarkable feat in railroad engineering is now being effected on the main line of the Canadian Pacific Railway near Toronto. Span by span the old steel bridge built in 1888 is being dismantled and replaced by heavier girders resting on new concrete piers without causing any interruption in traffic. During a six hour interval in the train schedule during the daytime tracks and ties are ripped up, an old span removed, and a new section weighing 45 tons is swung into place by a great crane especially constructed for the purpose. The short gap left between the new and the old spans is temporarily filled by special girders, new ties and track are laid by gangs of workmen, and the bridge is open to traffic again. Preparations are then made to tackle the next of the thirteen spans.

**News Notes**

John Kabyan, sugar factory employee, was held up and robbed of \$130 last Sunday evening. The robbery was committed by three unknown persons, still unapprehended, near the residence of Mr. Arthur Dahl.

Mr. Grant Young, at one time editor of the Raymond newspaper, was voted a seat in the Utah state legislature at the recent election. Mr. Young is the son of B. S. Young, one of Raymond's pioneers.

These cold frosty mornings remind us that the winter sport season is fast approaching, and that no organization has been effected for hockey nor basketball, with the School of Agriculture prepared to field both a basketball and hockey team, and the high school entering their usual snappy aggregation, together with the Union Jacks and the town intermediates again in the field prospects are good for a winter of sport better than ever before. But it is imperative that we organize.

The local sugar factory is nearing the end of its most successful run since its establishment here four years ago. It is estimated that by the first of December all the beets will be sliced. About 65,000 bags of sugar have been turned out to date.

Mr. Earl Stevens, of Barnwell, was a visitor in town last Wednesday.

Professor Takahashi, world famous jiu jitsu wrestler, will meet three local men at the Capitol Theatre next Monday night, November 19. Professor Takahashi will also demonstrate nerve control.

**LOST**—A fawn colored overcoat. Finder please return to the Recorder office.

**Recorder to Cover Magrath District**

After December 1st this sheet will be known as the Raymond Magrath Recorder. The editor met with the Magrath town council last week and they assured him of their support. It is our desire and aim to make this paper one of the best weeklies in the South country. To accomplish this we have purchased a typesetting machine known as the Intertype.

This machine is operated like a typewriter and casts the letters out of molten lead. When installed all advertising matter will be moved from the front page and four

pages will be home print. We expect a circulation of about seven hundred and fifty and in order to do this special inducements will be offered.

This equipment is costing somewhere near \$4,000.00, and if we make this venture a success we need your support. If a paper is placed in every home our advertisers can be sure that their offers will reach every one and they can feel that advertising pays. We aim to assist in building up a community spirit of cooperation, dealing with vital problems that interest all.
